For: **PROCESS FOR PRODUCTION OF ALCOHOLIC COFFEE DRINKS**

## Appendix B

Please amend the claims as indicated in the following clean copy of the claims.

1. A process for the production of an alcoholic drink having coffee flavor from an extraction residue remaining after roasted coffee beans are extracted with hot water or with an aqueous solution of alcohol, which comprises adding a saccharide to the extraction residue of roasted coffee beans and fermenting the resulting mixture in the presence of wine yeast for the brewing of alcoholic wine liquors.

16.

(New)

A method for reusing waste coffee residue

containing substantially little coffee flavor, comprising the

steps of:

adding a saccharide to the waste coffee residue of roasted  
coffee beans, and

fermenting the resulting mixture in the presence of wine  
yeast for the brewing of alcoholic wine liquors.
